

## USER GUIDE : Portable E601 Energetic Vitaliser

The E601 Personal Energetic Vitaliser will create a circular protective field and healthier environment of an area 10feet / 3metres in diameter, when it is in vertical orientation. Efficiency can drop to 60% if the unit is in a horizontal orientation, which is a marked improvement over previous generations of Portable Energetic Vitalisers.

These coverage figures are applicable whether it is carried on a person, being transported in a vehicle or if stationary.

Benefits of the unit's energetic field include the reduction of harmful earth energies (Geopathic Stress) and the effects of Electro Stress (also known as Electro-magnetic Pollution) such as that near computer equipment, mobile phones, mobile phone masts, electric pylons and electric sub-stations. Users will also experience a reduction in anxiety and tiredness. The unit acts as a great energy booster; just like the other products in the Geomack range, which is due to the unique Geomack Energetic Vitalising Technology, which is utilised in every model.

With the coverage of the E601 it can cover a double bed in all but the worst cases of harmful earth energies or Electro Stress. It can be placed at the side of the bed, or preferably underneath the bed in the centre. It must be said that it is, of course, preferable to cover the whole of one's home or workplace, which would require a larger model of Geomack Energetic Vitaliser.

For more energy put your E601 beside your computer; between your legs when seated or near you when in your car. If you have an ache or pain, try holding the E601 on the affected area and you will find that it has a relieving effect.
